

Speedfeeder 50 VV

Speedfeeder 60 VV

Speedfeeder 80 VV

Speedfeeder Duo VV

Most important features:

- For large groups of pigs
- Lid included
- 1 x 1/2" stainless steel water connection, 4 drinking nipples
- White transparent feed bunker, assess feed content from a distance
- Ingenious anti-spill rim and anti-spill bars on de the side, prevents feed spilling
- Very long-lasting feeder with high own weight (Speedfeeder 50 >30KG)
- Standard 2 x 35mm stainless steel U-profiles
- Standard spindle adjustment for very accurate and easy adjustment. Slide adjustment also possible on request
- Very strong complete stainless steel 304 dosing mechanism
- 500mm wide, 600mm wide, 800mm wide or 1200mm wide

The Speedfeeder is a feeder for large groups of pigs. The feed is dosed via a unique dosing mechanism in which the pigs push against a stainless steel tongue while they eat, which causes the feed to be dosed in small portions. So there is no spillage. The white feed hopper is transparent, so you can check feed quantities at a glance during your inspection round. The best dose is 4 g per movement. The Verba drinker nipples maintain the correct water/feed ratio to ensure good feed conversion. The whole Speedfeeder is installed with A2 stainless steel M8 bolts with locknuts. Special side profiles can be supplied if required. Guarantee: 7 Years on construction- and material faults; drinking nipples 1 year on construction faults. Drinking nipples are only suited for water, not for additives.

Options:

Mounting angles, 51mm stainless steel U-profiles, circulation pipe, slide adjustment, stud plate for under the feeder
